## PROFILE

I am a software developer driven by both professional dedication and a personal passion for technology.

As an active member of the open-source community, I regularly contribute to public repositories and maintain my own open-source projects. Additionally, I am deeply engaged in the study of Artificial Intelligence and AI-driven tools, exploring their impact on daily workflows and the broader software development landscape.

Passionate about knowledge sharing, I also create content, including articles and videos, focused on software engineering, open source initiatives, and emerging technologies.

---

## WORK EXPERIENCES

### Software Developer

Jun, 2023– present

#### Team System Spa

- Frontend development of cloud-based wellness management software solutions
- API design and development for cloud-based wellness management software
- Member of the “Hoverboard” project, serving as an AI Champion, responsible for researching and promoting AI-based tools within workflows for relevant teams

### Open Source Developer

Feb, 2022– present

**RGIS Italia, Ancona**

**Sep, 2018- Jul, 2019**

- Inventory Counting Clerk
- 

## SOFT SKILLS

- Clean code
  - Teamworking
  - Meticolosità
- 

## CERTIFICATES

- **SCRUM TEAM MEMBER ACCREDITED CERTIFICATION**
- 

## INTERESTS AND HOBBIES

Computer science is my passion. I love exploring tech topics beyond software development, with a particular focus on Linux and its internal workings.

I am a strong advocate of open source. I enjoy building libraries for my side projects and contributing to the community whenever possible.

Beyond coding, I am an avid gamer, I believe gaming sharpens cognitive skills and decision-making under pressure, which translates directly into my daily life. Recently, I've also developed a love for reading; beyond my usual manga, I am deeply drawn to history and fantasy novels.
